http://archive.org/details/StarWarsTheBook_EKVG_T_1080p_MirrorTranslated New - Movie ----- (1080p).. I did this on my last post where I got several torrents in the torrent from torrent hub and a few from a small local torrent site.

This time, I used an easy to use torrent viewer, it's free and has an interface which you can download for free from the official website of the torrent site. The easiest way was using that torrent website in an attempt to find out which torrents are popular where in the world. So, you can see the torrents below which I am only interested in the movie, this way, you can download the torrents that are available on your torrent site easily and easily.. Link I'm sure that some of you will agree with us that it's not very easy for a movie to become the biggest hit (even in countries that are more or less the same as India). There was a huge push in film and media piracy (and I don't even count legal online/offline piracy). With such a massive push of piracy it doesn't help anybody for the movie, especially when people don't know what piracy is actually all about. Even with legal methods like VPN's, file sharing etc, there are people who still use the methods. Therefore, in this case, it is still best to get the movie to a major film festival or similar place. Also, in case the content is not really of high quality (like in a digital movie), the torrent site could help in that. Some major sites also provide links to the torrent to give people more chance to find it after it has finished.
